

WorldCat Local November Install Enhancements

Customizable Text on Authentication Prompt

You can customize the authentication prompt in the OCLC Service Configuration, User Interface Options module.

The screenshot shows a configuration page titled "Customize authentication prompt for restricted content". It includes a description: "A prompt will appear when the user attempts to view records in WorldCat Local that require authentication. You can customize the text that appears in the prompt." There are two radio buttons: "Use default text" (selected) and "Use custom text". Below this is a "Message:" field with a text area containing "Some or all of the results you requested can only be displayed to members of Lehigh University Libraries." and a "Max 300 character limit" note. There are also fields for "Remote login button text" (containing "Sign into Lehigh University Libraries") and "Link text to unauthenticated searching" (containing "Do you want to view results that don't require authentication?"). At the bottom, there are checkboxes for "Link to Advanced Search page" and "Link to previous page".

The customizable sections of the prompt are the message, the remote login button text, and the link text to unauthenticated searching. You can also elect to have a link to the advanced search page and a link to the previous page. Below is an example authentication prompt with customized text. Number 1 shows that the library's name is now automatically part of the prompt. Number 2 is the customizable message, number 3 is the remote button login text and number 4 is the link text to unauthenticated searching.

The example prompt is titled "1 UNB Libraries authentication needed". The main message is "2 Some or all of the results you requested can only be displayed to members of UNB Libraries." Below the message is a button labeled "3 Authenticate here". Underneath the button, it says "Other options:" followed by a line of links: "4 Click here for unauthenticate results only | [advanced search](#) | [return to previous page](#)".

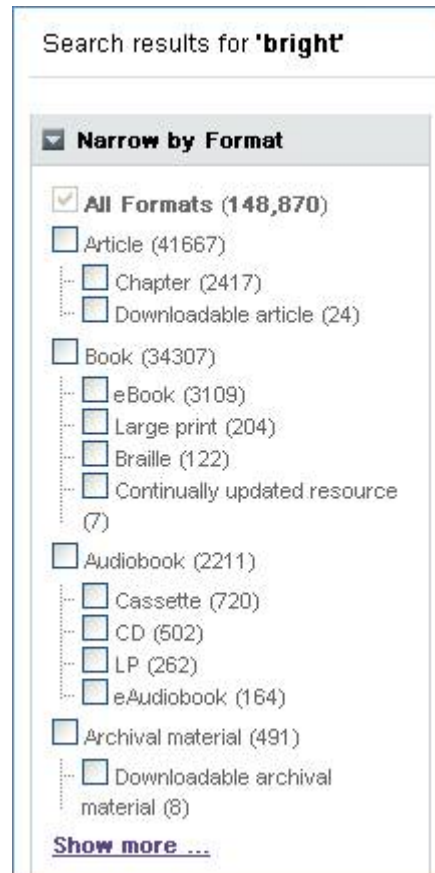

Changes to Format Facet and Format Limiter for WorldCat and WorldCat.org

We've improved the terms used in the format facet and limiter for WorldCat and WorldCat.org.

Advanced Search Limiters

Example of Format Facets

The format facet is now navigated by checkboxes. This means you can include and exclude format facets. Clicking the top level of a format checks all the subformats. When you select format facets and then click on a detailed record, you must use the "Return to Search Results" link to preserve your format selection.

Editions page format changes

The editions page also has a format facet with checkboxes that work as the format facet on brief results works.

Open issues relating to Format that will be fixed in the near future

1. "Online content & media" is used in format limiter, whereas "Internet resources" is still used on the format facet. We will be changing the term in the format facet to match the format limiter.
2. "Internet Resources" remains the term used in the format facet. It will be change to "Online content & media." However, items previously only listed under "Internet Resources" can now also be found under their respect parent facet if we can determine its item type. For example, eBook can now be found as a sub-facet under "Book".

3. The search count for the parent facets are incorrect and always larger than the result that returns when you click on them. The subfacet counts are correct.
4. The format facet selections are not persisting when the following actions are taken:
 - a. Whenever "show more" is clicked in other facets
 - b. Save Search completion
 - c. Add to list completion from search results
 - d. Copy/Pasting the URL from the search results after narrowing to formats. A permalink option will be made available on search results screens in the near future to create a link that maintains the format facet selections.

Corrected Clustering of Duplicate Articles from Centrally Indexed Databases

When an item is described in records from various databases, we cluster those records together. We had been showing only one of the additional databases. Now we show all the databases that the library has enabled and the user is authenticated to see. The additional databases are listed as "Other Databases" and are hotlinked to the specific records.

Slime Dwellers - A blanket seeded with microbes appears critical to coral health

Removed Non-Functional Links to OPACs

If an institution (at any level) is a virtual group, then there is a link on the detailed record to get the holdings from the specific library. There are some circumstances when those links will never function. They will not function when the record is not from WorldCat (i.e. there is no OCLC number) and the item is not held by level 1 or when level 1 does not return OPAC results.

This is the record in production today. If a user clicks on the link by number 1, the response will be what is shown at number 2.

Peer Review Indicator

A Peer review indicator will now display on the Brief Results and the Detailed Record pages. An item's Peer Review status is determined by an internal OCLC service which harvests data including Peer Review status from approximately 60 sources. The indicator will display next to the format type on the Brief Results and beneath the publication information on the Detailed Record.

A Note on the Pythagorean Theorem of Baseball Production

Author: [John Ruggiero](#); [Lawrence Hadley](#); [Gerry Ruggiero](#); [Scott Knowles](#)

Edition/Format:  Article : English

Publication: Managerial and Decision Economics, Jun., 1997, vol. 18, no. 4, p. 335-342
 Peer-reviewed

Database: JSTOR

Summary: Recent analyses of baseball managers' performances have employed the so-called 'Pythagorean Theorem' of baseball. This 'theorem' states that the ratio of wins to losses can be approximated by the square of the ratio of team runs scored to opposition runs scored. Recent publications assume this approximate relationship can be used to evaluate managers; implicit is the additional assumption that the Pythagorean

Configure 'Full Text and Open Access Links' Display Options

A new 'Full Text and Open Access Links' module is now available in the 'My WorldCat.org' section of Service Configuration. This module provides more granular control over the eLink display on the item details page, as well as the search results page. **We suggest that you review this section and resave your selections.**

For electronic resources supported by links from the WorldCat knowledge base:

- Complete a WorldCat knowledge base [request form](#)
- Load your local knowledge base data into the WorldCat knowledge base. Instructions for adding your library's local knowledge base information are [here](#).
- Contact the WorldCat Local Implementation team at worldcatlocalIM@oclc.org to request that this feature be turned on for your site. **NOTE:** This configuration setting can be turned on only after your local knowledge base data is present in the WorldCat knowledge base.

Full Text and Open Access Links

Required fields are marked with an asterisk (*).

Configure the display of full text links in WorldCat Local.

Detailed Record page - display the following links:

- Links retrieved from the WorldCat knowledge base to full text licensed content.
- Links from LHRs
(LHRs can be enabled on the "OPAC Statuses, Locations and Circulation Policies" module)

Search Results page - display the following links:

- Links retrieved from the WorldCat knowledge base to full text licensed content.
- Links from LHRs
(LHRs can be enabled on the "OPAC Statuses, Locations and Circulation Policies" module)
- Master WorldCat record 856 and 956 links to open access content/free content
 - .gov/ .edu documents (i.e., GPO.gov, ERIC, etc.)
 - HathiTrust
 - Internet Archive (Archive.org)/ Project Gutenberg (Gutenberg.org)
 - WorldCat Digital Collection Gateway (i.e., CAMIO, OAster, ContentDM, etc.)
 - Other (i.e., MARC 506)

Service Configuration Module Name Changes

In an effort to better organize configuration options in Service Configuration, the following name changes have occurred:

Enhanced eLink Displays on Item Details Page for OAIster and DOIs

Links to OAIster content have been moved to the library section of the 'Find a copy online' section' to allow easier access for users.

Also, 901/c DOI fields have been hyperlinked and will now display in the 'Find a copy online' section'.

Nielsen Evaluative Content

Nielsen Book Data cover art, reviews, summaries and award info will now display to provide more evaluative info to users.

Display LHR Data on WorldCat Local Item Details Page for all Formats (including supporting Service Config changes)

Local Holdings Record (LHR) display is now available for all item types (previously, only available for serials). LHR display can be enabled on the 'OPAC Statuses, Locations and Circulation Policies' module in Service Configuration. LHR eLink (856) configuration is available on the 'Full Text and Open Access Links' module (pictured above).

Monographs, etc. serial [X] e-serial [X] configure more items ▾

Monograph Configuration
Please list all status messages and fulfillment options that appear in your OPAC.
NOTE: If the location of an item impacts the policies you set for the item, please include all possible combinations of statuses and locations. If the location of an item does not impact the policies you set, please leave the location cell blank.

First display LHR with option to search local OPAC for availability

Allow users to initially view the online links and other data contained in the item's LHR, with an option to search the local OPAC for availability. If no LHR is found, availability is displayed automatically.
For information about loading Local Holdings Records, please see:
<http://www.oclc.org/batchprocessing/options/holdings/localdatarecords>
NOTE: The Any Status/Any Location fulfillment options for Monograph will be used when this box is checked.
