A Volume is defined as "a single physical unit of any printed, typewritten, handwritten, mimeographed, or processed work, distinguished from other units by a separate binding, encasement, portfolio, or other clear distinction, which has been cataloged, classified, and made ready for use, and which is typically the unit used to charge circulation transactions. Either a serial volume is bound, or it comprises the serial issues that would be bound together if the library bound all serials."

"Net" volumes added are the total volumes added to the collection ("Gross") minus withdrawals.

¹Berkeley's June 30, 2008 total was adjusted to include 436,467 ebooks not included last year.

²Davis' General and Total volumes for 30 June 2009 were incorrectly printed in this report. The correction was made on 11/03/10.

University of California Library Statistics
Table 2
Serial Titles
2008-09

	Purchased	Not purchased
Berkeley	72,944	33,164
Davis	41,395	19,659
Irvine	35,957	17,934
Los Angeles	23,504	15,471
Merced	34,554	26,782
Riverside	27,858	15,289
San Diego	48,333	30,868
San Francisco	30,982	26,833
Santa Barbara	30,251	34,068
Santa Cruz	27,596	7,449
Licensed by CDL	34,429	26,782

A serial is defined as: "a publication in any medium issued in successive parts bearing numerical or chronological designations and intended to be continued indefinitely. This definition includes periodicals, newspapers, and annuals (reports, yearbooks, etc.); the journals, memoirs, proceedings, transactions, etc. of societies; and numbered monographic series."

In 2009, the methodology for counting serial titles changed from catalog-based to SFX-based. The CDL provided SFX reports from June, 2009, to each campus for all licensed titles (Tiers 1, 2 and 3). The "Licensed by CDL" total is also acquired via the SFX report.

Campus reports include ALL serial titles acquired, whether through consortial licensing or local purchases.

3/09/10 Update: Merced's serial count has been corrected and the "total" column has been removed. Since there may be duplicates between "purchased" and "not purchased" titles, adding the columns may not necessarily provide an accurate number of total, de-duplicated serial titles.

*Most "electronic reference source" sessions and searches, when provided in this table, are incomplete.

Instructions and Definitions for Digital Resources

"**Electronic reference sources**" includes licensed citation indexes and abstracts; full-text reference sources (e.g., encyclopedias, almanacs, biographical and statistical sources, and other quick fact-finding sources); full-text journal and periodical article collection services (e.g., EBSCOhost, ProQuest, Academic Universe, and INFOTRAC OneFile); dissertation and conference proceedings databases; and those databases that institutions mount locally.

A **session** or login is one cycle of user activities that typically starts when a user connects to an electronic resource and ends with explicit termination of activities (by leaving or through logout or exit) or implicit termination (time out due to user inactivity).

A **search** is intended to represent a unique intellectual inquiry. Typically, a search is recorded each time a search request is sent/submitted to the server.

E-books is a subset of "Volumes" in Table 1. Count the number of electronic full-text monographs that are owned or leased by your library. This includes electronic books purchased through vendors, such as netLibrary and Books24x7, and e-books that come as part of aggregate services. Include individual titles of e-book sets that are counted as individual reference sources reported in #2. *Include* locally digitized electronic books, theses and dissertations. *Include* e-books obtained through CDL licenses for which the library pays a reduced fee or no fee.

Digitized collections can include born digital materials or those created in or converted from different formats (e.g., paper, microfilm, tapes, etc.) by the library and made available to users electronically. This includes locally held digital materials that are not purchased or acquired through other arrangements (e.g., vendor, individual or consortial licensing agreement). Born digital collections can include materials self-archived in an institutional repository. Created or converted digital collections can include electronic theses and dissertations (ETDs), special collections materials, maps, sound recordings, and films.

Views: Number of times the unique files were accessed.

Queries: Number of searches conducted (if there is such a capability) during the reporting period.
