ISRAC Call
August 12, 2005
Attendees: Maureen, Vicki, Susan, Brian, Maryly, Rosalie

1. OVERALL PLAN: Rosalie raised concern that we don't have an overall plan, timeline, tasks. Some agreed.

TASK: MAUREEN and ROSALIE work on a brief plan w/timeline

2. UCCSC PRESENTATION: Maryly and Margaret presented. It was well received.

--The presentation is available here:
http://libraries.universityofcalifornia.edu/hops/israc/documents/Interoperability_and_Image_Service_final.ppt
--New issue raised: Two campuses were interested in using Insight for internal communication images, public affairs, etc. UCSD has construction images and they want to share. UCSF has PR materials.

3. BOOKMARKS: about 175 left; Maryly will send them out to others

4. IMAGERSERVICE Page

4.1 OVERALL
--Many felt it was an improvement over the current CDL Insight pages, but it's still not perfect.
--One concern is when a user, coming from a campus page, on which they just chose Saskia, when they end up at this page, they will be confused.
--It is confusing for the end user that there are separate links to Saskia, Amica, etc.; they then feel that they will have to download the Java Client each time.

RECOMMENDATION: If campuses want to keep separate links to Saskia, Amica, etc, ok, but ISRAC recommends that they also include a link to the UC Image Service in their e-resources pages. Note: Artstor is analogous to Insight; campuses are not including links to the individual Artstor collections

TASK: We will need to get a PID for this page and have it cataloged.

TASK: EMILY ask Donald if there is any feedback from our quarterly report and if we can ask for a PID and catalog record for the UC Image Service Page.

4. 2. NEW CONTENT

--ONLINE INTRO TOUR It would be great to have a brief online tour of Insight.

TASK: MAUREEN will write the script. BRIAN will make it happen.

4.3 EDITS Suggestions:

--Don't link off to the ISRAC page, bring that content to the imageservice folders
--Ok to link to Luna help pages, but warn people they will be taken there

TASK: MAUREEN will send out help pages that she and Rena created to see if we should link to those instead of some of the Luna help pages.

--We need a page that lists contacts on each campus of who users go to to get passwords for higher privileges. We are currently using this page http://vrc.ucr.edu/luci/uc.htm, we need to create a page at CDL.

TASK: EVERYONE look at this page <http://vrc.ucr.edu/luci/uc.htm> and send to ROSALIE the names of who on your campus would hand out the passwords.

TASK: ROSALIE to find out. What does Deploy Director do? Would it remove the need for CDL to have a page at all; that is, allow campuses to link directly to the Java Client Download from their campus pages.

5. HIGHER PRIVILEGES
TASK: LENA will send out description of what you get with higher and regular privileges.

TASK: Everyone. We need to ask on our campuses if we need to have the higher privileges option.

6. FLIERS
TASK: EVERYONE: Tell Maryly how many fliers are needed for entire year.
