

UC Next Generation Technical Services
21st Century Emerging Resources
November 2, 2009

The team did not meet from Sept 15-Oct 15, mostly due to the chair's commitment on coordinating iPRES 2009, held Oct 5-6. We have started biweekly meetings and will have a phase I report for mid November.

The chair contacted Lisa Mix about NGTS-3 work on ETDs. There has been some work at CDL on a pilot project to collect ETDs and provide access through eScholarship. Work on this pilot has slowed due to iPRES and eScholarship's work on their new website. It is planned that this work will continue later this year. We shared the information we have collected with NGTS-3.
