

UC NGTS POT 1, Lightning Team 3.A: Identify and analyze existing UCL collections

Membership:

Eric Milenkiewicz, UCR (POT 1) Convener
Lisa Schiff, CDL (POT 1) Support
Sherri Berger, CDL
Jared Campbell, UCD
Stephen Davison, UCLA
Susan Mikkelsen, UCM

Charge: Identify/analyze existing UC Libraries digital collections for inclusion in the UC Libraries Digital Collection (UCLDC) and define the discovery/display features of the UCLDC in coordination with LT 1.A (Task 1.1.5). Guidelines for digital collections to be included in the UCLDC and a means to publicize these should be developed as part of this process. Mechanisms for the continual discovery of additional material and the promotion of the UCLDC's availability across the campuses, both within and outside the libraries, should also be identified.

Tasks:

1.3.2. Develop criteria/guidelines for collections to be included (addressing file types, rights management, and other issues) and a way to communicate resulting decisions.

1.3.3. Identify existing UC Libraries digital collections with potential for inclusion in the UCLDC (use DLSTF 1 Appendix 3A as a starting point, but identify other sources and mechanisms for reaching out beyond the usual respondents).

1.3.4. Identify mechanisms for continual discovery of additional materials, as well as mechanisms for promoting the availability of UCLDC across the campuses.

1.3.5. Define the discovery and display features/requirements of the UCLDC, in coordination with LT 1.A (Task 1.1.5), keeping in mind asset managers as well as end user needs and expectations.
