SCP Updates

- No update

Other

Unsuppressing collection level bibliographic records for CDL aggregator/selective package resources (Kevin, Sarah)

- Discussed this as a group
- Decided that as a starting point we could create a list of the priority collections to request that SCP/CDL unsuppress the collections
- Possibly, update the records to higher level cataloging down the road, as needed
- TJ Kao will start a document and we will attempt to limit to 25; two week deadline
  - https://docs.google.com/document/d/1s1cQta8tQ_mKfWl3MeTga94nw_Pg3A4-2Ak8vGewbCU/edit?usp=sharing
- Perhaps ask if we can sample about 5 prior to the end of the two week period
- Should we recommend where in the priority order this would go?
- Perhaps make a recommendation for future consideration to be based somewhat on Primo Analytics?

Tip for troubleshooting (TJ)

Example 1. When norms collide (NZ MMS ID 9914793089106531)

Example 2. Reproduction justification (NZ MMS ID 9914796864906531)

Both are CDL resources. Portfolios are activated in NZ but there is no information on which campus has access to the resource. As a result, both show up in UCD Primo as available. Thanks to the suppressed SCP bib/portfolios in IZ, we were able to figure out that UCD has access to the second one but not the first one.

It would be very nice if all CDL collections are set up like JSTOR Arts and Sciences VII (collection ID 61403073150006531)

- This was listed as the top priority for cleanup in the update from Adriana so we did not discuss fully.
