A Volume is defined as "a single physical unit of any printed, typewritten, handwritten, mimeographed, or processed work, distinguished from other units by a separate binding, encasement, portfolio, or other clear distinction, which has been cataloged, classified, and made ready for use, and which is typically the unit used to charge circulation transactions. Either a serial volume is bound, or it comprises the serial issues that would be bound together if the library bound all serials."

Consistent with the Association of Research Libraries' (ARL) annual statistics survey, the UC library volumes count includes ebooks. See Table 8, Digital Resources, for the number of ebooks reported by the libraries.

"Net" volumes added are the total volumes added to the collection ("Gross") minus withdrawals.

<sup>1</sup> The Shared Print Collection is housed on campuses and in the RLFs. It consists of JSTOR (retrospective), WEST (retrospective), journals for licensed content (prospective), print monographic series (prospective), literary presses (prospective), CoreStor (retrospective), IEEE Journals and Proceedings (retrospective), EEBO STC I and II microfilms (prospective), ArtStor Hartill Collection slides (retrospective), Springer print monographs (prospective), the HathiTrust monograph archive (retrospective), the Federal Documents Archive for serials and monographs (retrospective), and Canadian Literature monographs (prospective). Volume equivalents are reported here.

A serial is defined as: *"a publication in any medium issued in successive parts bearing numerical or chronological designations and intended to be continued indefinitely. This definition includes periodicals, newspapers, and annuals (reports, yearbooks, etc.); the journals, memoirs, proceedings, transactions, etc. of societies; and numbered monographic series."*

Licensed by CDL serial title counts came from Alma Analytics and included anything that was activated prior to 7/1/2022.

***Campus reports include ALL serial titles acquired, whether through consortial licensing or local purchases.***

#### **Instructions and Definitions for Digital Resources**

"**Electronic reference sources**" includes licensed citation indexes and abstracts; full-text reference sources (e.g., encyclopedias, almanacs, biographical and statistical sources, and other quick fact-finding sources); full-text journal and periodical article collection services (e.g., EBSCOhost, ProQuest, Academic Universe, and INFOTRAC OneFile); dissertation and conference proceedings databases; and those databases that institutions mount locally.

A **session** or login is one cycle of user activities that typically starts when a user connects to an electronic resource and ends with explicit termination of activities (by leaving or through logout or exit) or implicit termination (time out due to user inactivity). Note that **sessions** will be phased out after this year.

A **search** is intended to represent a unique intellectual inquiry. Typically, a search is recorded each time a search request is sent/submitted to the server.

**E-books** is a subset of "Volumes" in Table 1. Count the number of electronic full-text monographs that are owned or leased by your library. This includes electronic books purchased through vendors, such as netLibrary and Books24x7, and e-books that come as part of aggregate services. Include individual titles of e-book sets that are counted as individual reference sources reported in #2. *Include* locally digitized electronic books, theses and dissertations. *Include* e-books obtained through CDL licenses for which the library pays a reduced fee or no fee.

**Digitized collections** can include born digital materials or those created in or converted from different formats (e.g., paper, microfilm, tapes, etc.) by the library and made available to users electronically. This includes locally held digital materials that are not purchased or acquired through other arrangements (e.g., vendor, individual or consortial licensing agreement). Born digital collections can include materials self-archived in an institutional repository. Created or converted digital collections can include electronic theses and dissertations (ETDs), special collections materials, maps, sound recordings, and films.

**Views:** Number of times the unique files were accessed.
