SCP Updates (Shi, Becky)
- SCP proposal to stop using 930$g: Before migration, SCP has used 930 $g to indicate the status for a serial in a serial package: code a=active, i=inactive, m=moving wall. It was used for statistics purposes for some campuses. After migration, serial coverages are recorded in portfolios; most CDL serials are CZ managed bib records with CZ portfolios and don't have SCP 930 field. Does any campus still use SCP 930$g to pull statistics? any reasons that we shouldn't stop using 930$g?
