Announcements (All)

UCLA: Working on draft Idea Exchange proposal with Community Zone Management Group to have OA indicator live at the collection/portfolio level rather than bib level (just focusing on CZ portfolios right now, and ignoring CDI records). Trying to do a pilot project in Sandbox to activate OA collections in order to generate far more links to OA resources in CDI records. But running into delays due to Sandbox functionality.

UCSB: just made some very large end-of-year purchases including about 65 new databases/collections; taking the opportunity to track how the same databases have been treated by other campuses and see if our current best practices (local) should be adjusted; at the same time we are transferring our Databases A to Z list from Drupal to SpringShare, trying to utilize some of our metadata in bibs with SpringShare descriptions, etc.
