Fiscal Year 2024-2025

Prepared by the Alma Annual Statistics Analytics Project Team (AASA-PT)

for the University of California Libraries and the University of California Office of the President

The University of California (UC) Libraries have maintained annual statistics regarding collections, operations and select services for over 75 years; some of these statistics are also utilized by the UC Office of the President (UCOP) for Regents reporting and risk management.

The Alma Annual Statistics Analytics Project Team (AASA-PT) was charged in 2022 to determine the extent to which the libraries can meet our shared data reporting obligations through harmonizing and centralizing data outputs in the Alma Analytics Network Zone. Beginning with the 2022-2023 reporting cycle, the AASA-PT has compiled annual statistics generated from the UC Alma Network Zone Analytics as well as campus-supplied statistics generated from campus institution zones and non-Alma (e.g., local manual counts, affiliates on separate integrated library systems, etc.) sources.

In this third year of work, the AASA-PT has continued to refine practices developed over the previous two years of work.

Ongoing practices for annual statistics reporting

- Holdings stored in UC's systemwide library facilities (SLF) are attributed to the applicable campus depositor and based on the facilities' holdings records. For campuses with affiliates, SLF holdings are attributed to the applicable affiliate where that data is available.
- Each campus' electronic licensed content statistics also includes the shared licensed content that is managed by the California Digital Library (CDL) for local campus users.

New practices for 2024-2025 reporting

- AASA-PT no longer attempts to report withdrawn statistics
 - Withdrawn statistics were not included in previous years' summary reporting due to data inaccuracies and outstanding questions about campus practices managing data about withdrawn materials
- Refined circulation statistics reporting
 - Campuses identified additional equipment and ILL locations
 - AASA-PT clarified which data sources are used for intercampus and interlibrary loan reporting

Additionally, AASA-PT implemented decisions to streamline statistics-generation and -reporting tasks and clarify the scope of the AASA-PT's work. These decisions are documented on the [UC Libraries SILS AASA-PT Wiki](#).

These changes were made using the team's iterative and consensus-led process, and ultimately adjusted UC Libraries' reporting toward greater accuracy; these changes are in alignment with the [AASA-PT's May 2023 report and recommendations](#) endorsed by the Council of University Librarians (CoUL), Direction and Oversight Committee (DOC) and SILS Leadership Group (SILSLG). Harmonizing and centralizing annual statistics reporting will continue to be an iterative, consensus-led process. The 2023-2024 statistics generation and summary is based on

the 2022-2023 prototype; feedback is welcome and can be directed to team members listed on the [UC Libraries SILS AASA-PT Wiki](#).

The more detailed statistics tables found within this summary report are available at [UCL/UCOP Stats Report Fiscal Year 2024-2025](#).

** UCSF Archives and Special Collections has digital collections dispersed across many platforms. MB size includes only the public facing artifacts storage without the addition of backup copies in the count (per instructions.) Analytics on page_views gathered from Google Analytics. Analytics for Queries gathered from Google Analytics Pages report capturing the number of times a /results/ page was visited. SiteImprove was not available for any stats pre-February 2025. MB size includes Nuxeo stats, born digital, web archives, and researcher requests in Box. Analytics include site visits to: Calisphere, Japanese Woodblock Prints collection, Synapse, California Revealed.
